

FOR IMMEDIATE RELEASE

Information & Communication Systems (ICS) Opens Office in Scottsdale Airpark

SCOTTSDALE, AZ--- Information & Communication Systems (ICS) today announced that it has opened a new office in the Scottsdale Airpark at 7575 E. Redfield Road and enhanced the sales and support teams. Information & Communication Systems is a system integrator. They design, implement and maintain computer networks, create and support web sites and databases. They also are a licensed low voltage cable contractor. Joining the ICS team are Daniel A. Frelka and Matt Heffern.

Daniel Frelka has joined the ICS team as Senior Account Manager. In his new position Frelka will be responsible for sales of all ICS products and services. "Dan has a broad knowledge and years of experience in the information and communications industry. His unique understanding of our products, markets and strategic direction make him a driving force behind implementing the company's objectives," states Diane Nowak, President of ICS. "His solution selling approach and technical understanding complements ICS' commitment to customer support. I am confident that Dan will play a key role in bringing ICS' total value proposition to all of our customers."

Matt Heffern has joined the ICS team as a Senior Network Engineer. "Matt is a very talented network specialist who's capabilities cover a broad range of platforms and technologies," stated Nowak. "Matt has had experience in many types of network service projects from routine maintenance to full-scale design and support for large organizations. He has also achieved a degree in mathematics and the coveted Microsoft Certified System Engineer (MCSE) certification. Given our rapidly expanding client base and product suite, I know Matt will contribute significantly to the company's business plan and future growth."

"Our new office in the Scottsdale Airpark and the additions to our team will allow us to better serve our clients and strengthen our position as an outsource IT and communication industry resource firm. We are pleased and excited to have these experienced professionals on our team." said Robert DelGarbino, Chief Technology and Operations Officer for ICS. He continues, "ICS' philosophy of delivering quality service and customer driven solutions by providing critical thinking business specialists that focus on assisting organizations achieve their business goals through the efficient use of modern technology, has allowed us to embrace and change with the improving economy that is now creating a greater need for computer networking experts."
